

**Good for drivers.
Great for business.**

Harness the power of GPS, AI safety cameras, vehicle diagnostics, and driver rewards to create a fleet tracking system that not only does the job but makes everybody’s job easier to do. Safety, accountability, and efficiency are gained at every turn. From the moment the first driver turns on the ignition until the last driver signs out, Signature Telematics, powered by Azuga, is on the job. Every mile, every stop, every vehicle, and driver alert—every action— is tracked, analyzed, and reported to improve safety and efficiency.

WennSoft has integrated telematics into Signature Schedule 2023 with an updated frequency of vehicle locations in near real-time without the need of a mobile device. Plus, a dynamic portal (fleet.wennsoft.com) provides access to view real-time map views, configure geofencing, provide track me links and more.

Engineered for the Future

The flexibility of the Azuga API enables future Signature integrations to be prioritized based on customer requirements.

Put safety first.

Take advantage of information—such as speeding, hard braking, cell phone distractions, and service warnings—to keep both drivers and vehicles performing at their best.

Keep tabs on your fleet.

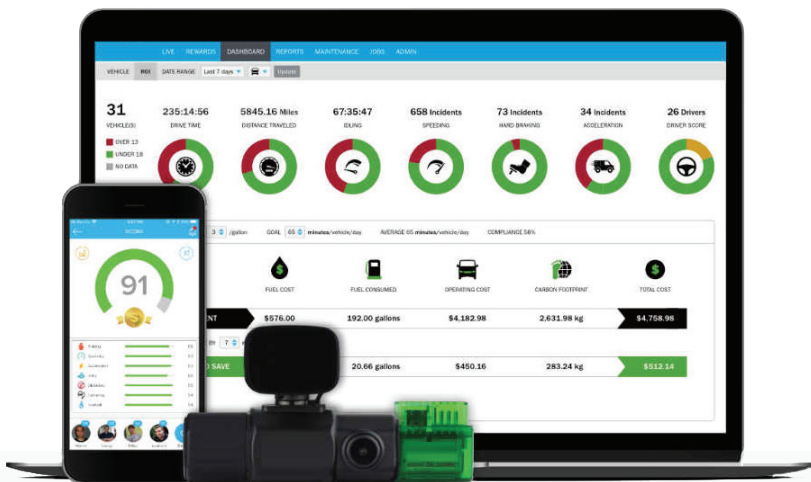

Use the live map view to see where your fleet is at all times. Job, driver, speed, location, and weather information is available instantly.

Reward driver excellence.

Great drivers are invaluable—reward and retain them. Signature Telematics, powered by Azuga features a rewards program that’s easy to administer, and drivers love.

Utilize Signature Telematics, powered by Azuga.

You’ll manage a safer, less costly and more efficient fleet. Low up-front costs, coterminous contracts, no termination fees. For one price you get all the data and reports for visibility into your workforce and control. Savings, driver safety scores and rewards, vehicle maintenance, and much more are included.
